

[Onboarding] [Navigation] app loads, checks user, navigates to onboarding, becomes frozen #25

I encountered the case where I was signed in by FirebaseAuth already but hadn't completed the onboarding make,year,model,name process yet. Upon loading the app, it automatically navigated me to the Onboarding screen. Once there, I couldn't scroll or click the next button, or do anything. Appears to be completely frozen and I have no idea why.

I refreshed the ios emulator and everything worked fine.
